Roadmap

 $\rightarrow$ 

www.cardanocash.org WHITEPAPER

#### The Mission

Cardano Cash \$CCH will be widely accepted as a payment method on commercial websites like Shopify and payment processors such as NowPayments, Cryptomus, BitPay, Confirmo, and Stripe.

ADA has not been able to achieve this so far, which is one of the reasons it has not realized a broader adoption.

Total supply: 20,999,999 tokens

Decimals: 8

Chain: Cardano

The founders of the Cardano Cash \$CCH are anonymous, but by the middle of 2025, the Cardano Cash will be handed down to the community, which will consist of the several volunteer leads:

Software engineers, developers, strategists,
communications and social media managers and admins.

#### Token Burn

Cardano Cash solves one of the key issues in the crypto space - inflation. The project effectively combats inflation through a quarterly token burn, making the token deflationary.

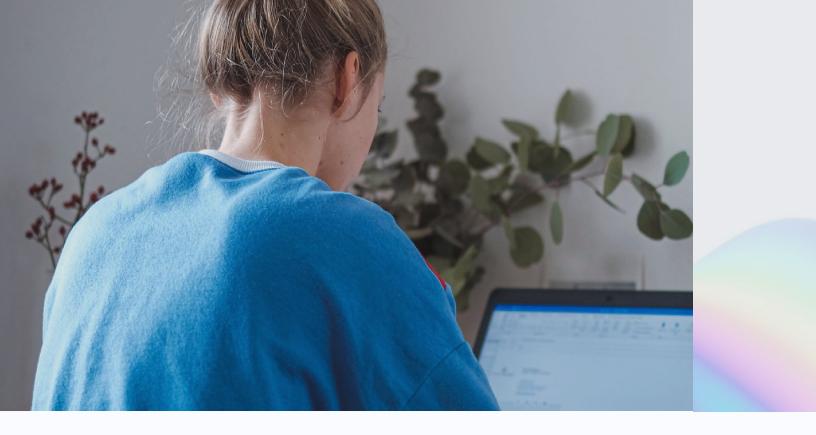

10% of the tokens will be burned in 10 years. Each quarter, 52,500 tokens will be bought back from the markets and sent to a burning address, which nobody can access anymore.

Upcoming burns in 2025:

January 29, 2025 May 29, 2025 August 29, 2025 November 29, 2025

The same monthly schedule and exact quantity of the tokens will be burned every year until 2035.

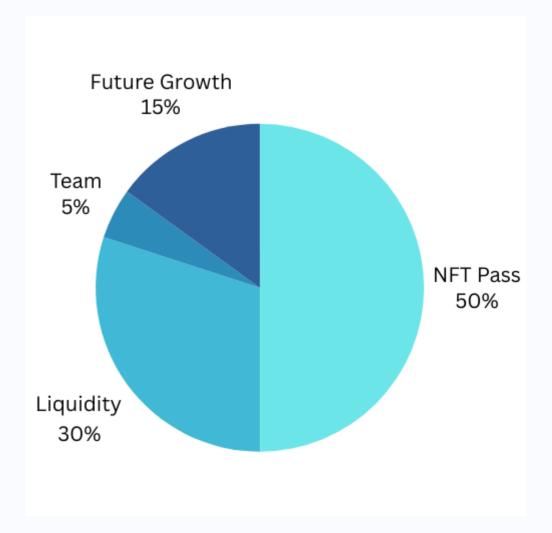

#### NFTokenization as a Presale

We are NFTokenizing 50% of Cardano Cash total supply. Users will be able to mint 10,000 Cardano Cash Pass NFTs for 50 ADA each.

Each NFT "holds" 1,050 Cardano Cash \$CCH tokens. On July 10th, these tokens will be airdropped to the Cardano Cash Pass NFTs holder's wallets.

The main advantage of this approach is that the early adopters - holders of the Cardano Cash Pass NFTs, besides getting the \$CCH tokens are eligible for future rewards airdrops.

### **Tokenomics**

NFT Pass Mint: 50%

Liquidity: 30%

Future Growth: 15%

Team: 5% (Vested for 2 years)
